

AI-PAMI Presents: Approaching Pain Using Psychologically Informed Practice

A free online pain management webinar for health care providers working with adults ages 50+ with pain. The webinar will focus on psychologically informed practice, a secondary prevention approach that first aims to identify individuals at high risk for transitioning to chronicity and then provides tailored treatment to reduce that risk.

Presented by University of Florida and
Brooks Rehabilitation researcher and
physical therapist
Jason Beneciuk, DPT, PhD.

When: Dec. 1, 2020 from 5-6 p.m.

Cost: FREE

Register online: rebrand.ly/painPIP
